Citadel Group is a leading software and services company which exists to keep people and information safe. Our market leading enterprise health and tech software helps our customers change the world. Our people are our business, and we set them up to collaborate with experts locally and globally, and with opportunities for them to grow at the same rapid pace as the company.

In over 30 years Citadel Health has evolved a suite of highly-specialised clinical and diagnostic software solutions which support improved healthcare workflows that drive better patient experiences & outcomes. This is an opportunity to work for a company that is truly making a difference to patients across Australia and UK.

What's Involved...

The Citadel Health Team is expanding rapidly and we are currently seeking an experienced **Software Engineer with 5+ years C/C++ development on linux** in a

commercial environment. The role will see you engaged in the software development, testing and maintenance of mission critical health applications, and development and maintenance of technical standards and documentation.

What's in it for you...

- Performance & Development Programs.
- Flexible Working Culture: 3 days in office & 2 working from home with 1 team day in the office to maintain collaboration.
- Paid Parental Leave.
- Identified Career Pathways across the business.
- Strong, supportive and innovative team.

What we're looking for... Someone with;

You will be degree qualified in Computer Science or equivalent and have a proactive attitude towards delivering results and continued learning. Your high levels of motivation will complement your excellent problem solving skills, ability to work under pressure and collaborate effectively within the team.

Experience with agile development processes, using Jira and Confluence for workflow and collaboration, is desirable but not essential. A demonstrated understanding of the purpose and formats of requirements documents, design documents, user guides, coding standards, blueprint and pattern guides, version control and peer reviews.

What next?

If this sounds like you and you are ready to join a world-class team then click the 'Apply Now' button.

All applications will be kept strictly confidential and we can only consider candidates who are currently residing in Australia with full working rights.

We are able to achieve the success we have because of the strength of our people. We are a diverse workforce and treat people fairly regardless of age, race, ethnicity, gender or sexual orientation.

We are committed to providing reasonable arrangements to all individuals participating in our application and interview process, If you require any accommodations or adjustments prior to submitting your application or throughout your interview process, please contact our Talent team directly.

Employer questions

Your application will include the following questions:

Which of the following programming languages are you experienced in?

Which of the following statements best describes your right to work in Australia?

What's your expected annual base salary?

Be careful

Don't provide your bank or credit card details when applying for jobs.
